

City of Toronto Survey

Mayoral election, City Hall and the cost of living

FIELD DATES

October 11-16, 2026

WEIGHTING

Age, gender, education and Community Council Area
(2021 Census)

CRIC PROJECT CODE

20261010-BU948

SAMPLE

991 City of Toronto adults (18+)

MARGIN OF ERROR

±3.1%, 19 times out of 20

Survey methodology

About Build Canada

Build Canada is a non-profit organization made up of entrepreneurs, leaders, and motivated citizens, committed to driving Canada's growth. We work with this community to build tools for civic engagement, publish bold policy ideas, and connect ambitious people. Learn more and join the movement on our website, and be sure to subscribe to our weekly newsletter to never miss a beat.

Methodology

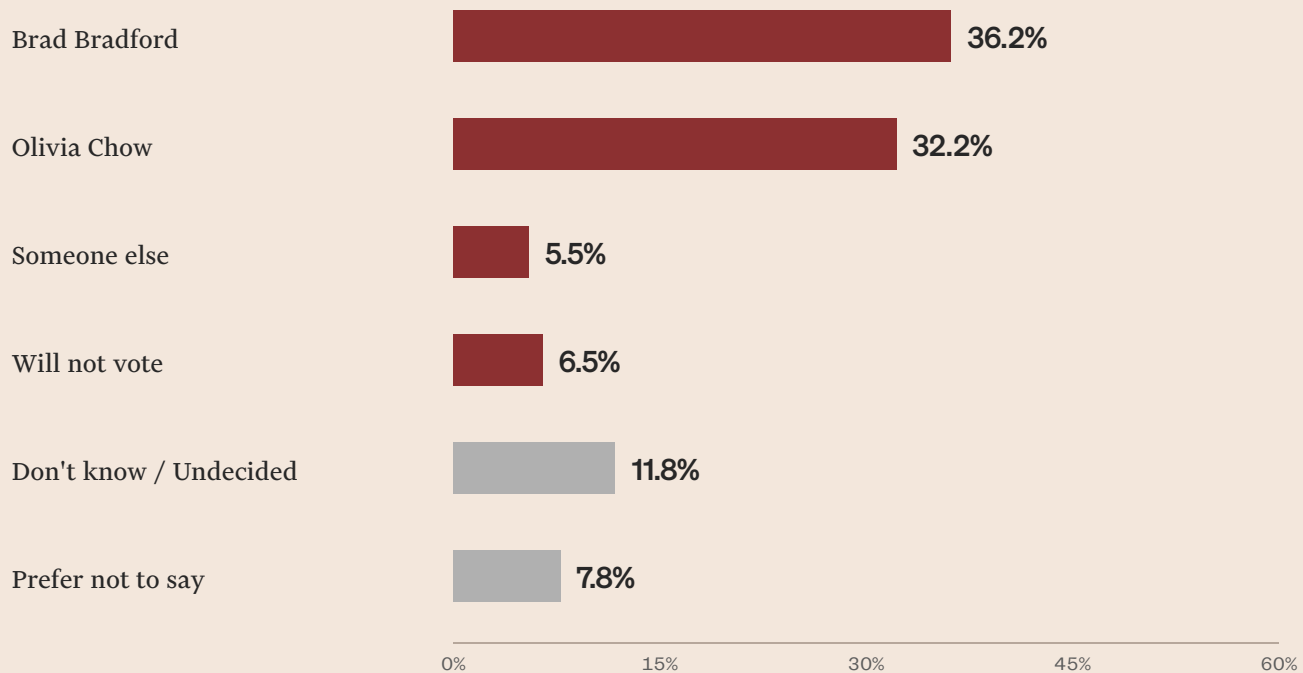

Build Canada conducted a survey of 991 randomly selected Toronto adults October 11-16, 2026, using SMS-to-online technology. Participants were reached through random digit dialing (RDD) to cellphones.

The resulting data was weighted to match 2021 Census targets for the City of Toronto by age, gender, education and Community Council Area. For the poll, the margin of error is +/- 3.1 percentage points, 19 times out of 20. The margin is higher for sub-samples. Totals may not add up to 100% due to rounding. Full question wording, question ordering and tables are available at buildcanada.com/polls/toronto-election-2026.

The survey was commissioned, funded and conducted by Build Canada. Build Canada is a member of the Canadian Research Insights Council (CRIC) and adheres to CRIC's Opinion Research Standards and Disclosure Requirements. This survey was registered to CRIC's Research Verification Service under project code: 20261010-BU948.

If the mayoral election were held today, who would you vote for?

Respondents who answered • n = 990

If the mayoral election were held today, who would you vote for?

Respondents who answered • n = 990

Mayoral vote intention among decided and leaning voters

Decided and leaning voters • n = 820

Respondents who were undecided were asked which candidate they lean toward and are included if they named one. Excludes those still undecided (8.3% of respondents) and those who will not vote or preferred not to say (14.3%). The 4.7-point gap between the top two is not statistically significant.

Mayoral vote intention among decided and leaning voters

Decided and leaning voters • n = 820
